

**Puig**  
*Hi-Tech Parts*

**2024**

*Our passion from within*

We start 2024 by boosting digitalization, announcing our new website that will allow you to navigate by motorcycle type, allowing you to find products in an easier and more intuitive way. Likewise, B2B receives improvements in design and new functionalities.

In reference to digital communication, generating greater visual and multimedia content both at the explanatory level of the product and at the level of social networks. Faithful to the technical collaboration in **MOTO GP** and **SUPERBIKES** in the **HRC (MOTO GP)** and **KRT (SUPERBIKES)** teams, testing new materials, shapes and designs that are already being applied to the products in this new catalogue. From here, we support both teams with all our technology so that they give us a new world crown to add to our record.

We want to highlight the following **2024 news** that you can find in the catalogue:

- **Upper front area:** Fury semi-fairing (page 136), Dashboard Protector (page 154).
- **Handlebar area:** Pullback risers (page 162), Bond rearview mirror (page 208), Hi-Tech V rearview mirror (page 210), Z3 rearview mirror (page 240), Rearview mirror thread trim cap (page 244), Covers mirrors with turn signals (page 250).
- **Tank area:** Challenge tank protector (page 294), Grasp tank protector (page 299).
- **Intermediate front zone:** Hi-Beam 3.0 auxiliary lights (p. 336), Dart turn signal (p. 346), Tab turn signal (p. 346), Rugged turn signal (p. 345).
- **Chassis-engine area:** Exhaust protector (page 384).
- **Wheel area:** Performance strips (page 460).

Once again we appreciate the trust you place in the brand, a reason that encourages us to continue pushing to keep this catalog up to date, year after year.

# TIMELINE

**Workforce:** 3 Workers

**Infrastructures:** 100m<sup>2</sup> - 1 Location

**Main Product:** Touring Fairing

**Technology:** Fiberglass - Manual processes

**Countries where it is sold:** Spain

## 1964

### Company Foundation: "PUIG FAIRINGS"

In the garage of their house in Granollers, Spain, the brothers Josep and Jaume Puig founded the company "Carenados Puig" as a result of their motorcycle passion, only 100m<sup>2</sup> that saw the birth of a dream, making motorcycle fairings.

The two founders were Derbi workers, and they materialized their dreams by turning their passion into their work.

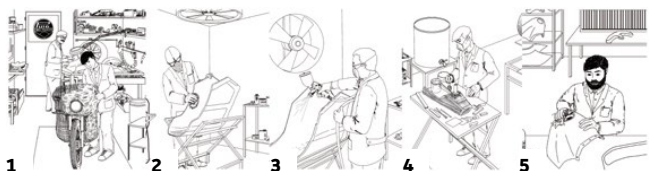

On the left of the image we see Josep Puig, who is in charge of the commercial part of the company, and on the right Jaume Puig, responsible for the technical part and the design of the pieces.

Photographed on a competition Montesa 250cc with Puig fairing and screen in Granollers, very close to where the company's headquarters are currently located.

"LEG SHIELD"  
for DERBI 49CC

### PRODUCTION PHASES

## 1967

### New products

TOURING FAIRING for DERBI 49CC

"LEG SHIELD" for DERBI 49CC

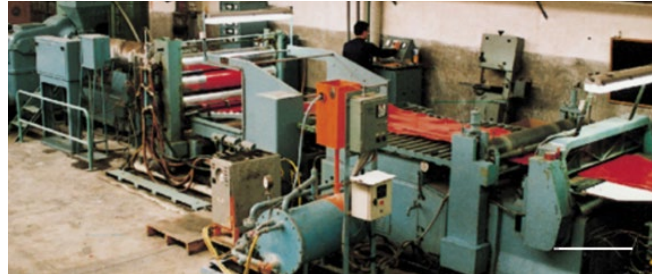

### PRODUCTION PHASES

1. Design and prototypes
2. Molds
3. Paint the mold with gelcoat
4. Layering of Polyester fiber
5. Demould and polish --- Finished part

## 1980

### EXPANSION OF THE FACILITIES WITH THE NEW SECTION OF POLITÉ SHEET BLOW MOLDING AND LAMINATING

A new blow molding section is commissioned to serve the Puch of Gijón brand and the sheet extrusion machine is used to produce the thermoformed semi-fairings and windshields for the Derbi and Vespa.

EUROPA II FAIRING  
for the Yamaha XJ650

M6 trunk  
made of plastic

Fuel tank for  
Montesa Cross-Enduro

## 1985

### THE RANGE OF PRODUCTS IS EXPANDED

The new blow-moulding machinery allows closed shapes to be created that are empty on the inside, and that in turn to be able to manufacture tanks and boxes for transporting objects.

Europa II Fairings are designed and built for the Yamaha XS400 and XJ650. These were the first complete fairings to incorporate aerodynamic protection for the rider's legs, arms and torso, thanks to the wraparound fiber part and the large screen.

## 1996

### NUMERICAL CONTROL INCORPORATION

First 5-Axis robot.

The manufacture of polyester fiber is a very traditional process that does not allow meeting the growing demand and it is decided to promote thermoforming and pressing. More industrial processes to be able to manufacture more standardized parts and meet demand.

The production of fairings in polyester fiber is abandoned, and focuses on the design and manufacture of screens in acrylic material.

1. TG WINDSHIELD
2. CUSTOM SCREEN
3. NAKED WINDSHIELD
4. SEMIFAIRING CITY
5. CARGO BOX FOR MOTORCYCLE MADE OF PLASTIC

## 2000-2004

### THE ORIGINAL REPLICA, TOURING AND DOUBLE BUBBLE SCREEN LINE OF PRODUCTION BEGINS AND MOVE TO A NEW WAREHOUSE

Puig also begins the manufacture of screens for motorcycles with original windshield. Puig screens are designed with small changes compared to the originals, in order to provide more style, protection, aggressiveness...

The design and production section moves to the new headquarters in the Can Castells Industrial area in Canovelles, Spain, the 1000 square meter warehouse is adjacent to the blow molding section.

ORIGINAL REPLICA SCREEN

DOUBLE BUBBLE RACING SCREEN

TOURING SCREEN

Image of the front view of Barcelona street.

## 2009-2023

### WORKING WITH THE BEST TEAMS

Puig strongly commits to being with the best riders and teams, a strategy that rewards the catalan manufacturer by winning several world championships and from which a lot of Know-How is acquired thanks to working with top professionals in the industry.

## 2012

### EXPANSION TO THE USA – PUIG USA Inc

New distribution warehouse.

With the firm desire to open Puig brand to the American and South American markets by offering great service and competitive delivery times, a new headquarters is opened in Orlando (Florida) from where Puig products can be shipped to these markets.

Image of the front view of the Puig USA warehouse in Orlando.

Remodeling of the Puig headquarters in Granollers.

## 2015

### IMPLEMENTATION OF PICKING OPERATIONS

Through automated vertical warehouses.

## 2017

### PRODUCTION LINE AUTOMATION

Incorporation of the latest technology, Nesting1.

## 2020

### AUTO THERMOFORMING PROCESS

Incorporation of a fully automated thermoforming machine.

## 2023

### EXPANSION OF THE PRODUCTION LINE

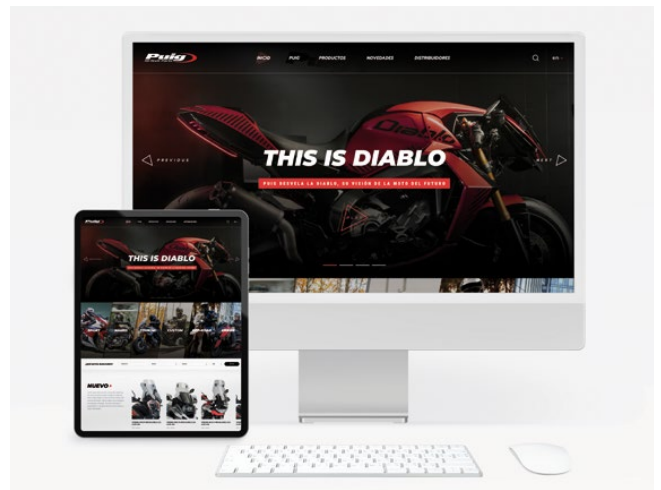

Beginning of the second production line, Nesting2.

Our packaging is produced in 100% recyclable plastic material.

LDPE

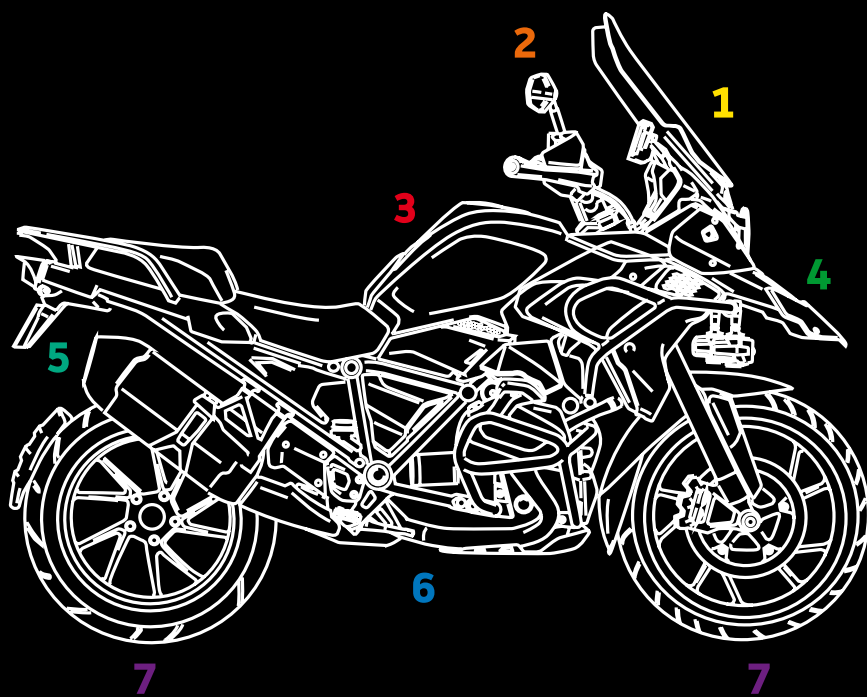

100% RECYCLED MATERIAL

## 2024

### WEBSITE AND B2B UPDATE

Improvements in both tools to adapt them to new technologies.

YAMAHA YZF-R1 / M  
2015

**DOWNFORCE - SPEED GRAPHIC**

Speed (km/h)	Downforce (kg)
80	0.5
100	1.0
120	1.5
140	2.0
160	2.5
180	3.0
200	3.5
220	4.0
240	4.5
260	5.0
280	5.5
300	5.9

The Downforce that the spoilers generates rises potentially as the speed increases. at 300 km/h we get 5.9 Kg/f.

El downforce generado por los Spoilers, se incrementa al aumentar la velocidad, a 300km/h podemos obtener 5.9kg/f.

**5.9Kg/f**

They consist of:

- Set of spoilers made of 4 mm. thick CN High-Impact acrylic. Always in black.
- Set of deflectors available in colors.

Puig's Downforce Sport spoilers have been developed thanks to the experience and tests carried out by the Kawasaki Racing team on the WorldSBK championship circuits. Get the ultimate racing touch and improve the cornering of your motorcycle with these Downforce Sport spoilers.

Aerodynamic test supplied along most of our spoilers.

They are made up of two elements:

- Supports injected in flexible black plastic that adapt perfectly to the fairing of your motorcycle by means of a 3M dual lock adhesive, strong, resistant and durable, but that can be removed and does not damage or require holes in your fairing.
- Spoiler in closed form, which is made of 4 mm. acrylic material. To choose a color, following safety regulations, with rounded edges with a radius >2 mm., a highly rigid and light material that is perfect for receiving aerodynamic pressure and directly translating it into downforce.

This product, extracted from the experience of the brand in the Moto GP championship, manages to provide greater air pressure in the front end in high-speed sections and improve cornering.

2017-2019

The Downforce that the spoilers generates raises potentially as the speed increases, at top speed we get 3.3 Kg/f

El downforce generado por los Spoilers, se incrementa al aumentar la velocidad, a máxima velocidad conseguimos 3.3 kg/f

**3.3 Kg/f**  
Puig

Naked spoilers are made up of:

- Spoiler-covers in matt black ABS material, which are easily installed on your motorcycle by means of metal supports with an anti-corrosion finish in black, light and resistant.
- Deflectors, which are made of 4 mm. thick CN acrylic material and a color to choose from (colors defined according to models). These deflectors have a rounded  $\varnothing$  4 mm. edge for greater rider safety.

The NAKED spoilers are an adaptation of the most cutting-edge innovations in competition in the field of aerodynamics applied to your motorcycle, providing it with the best performance and an incomparable sport style. Designed and manufactured in Barcelona with the most advanced technologies to achieve a technical product with the best aesthetics and finishes.

Aerodynamic test supplied along most of our spoilers.

**FRONT DEFLECTOR**

**IMPACT RESISTANT**

**PMMA  
ACRYLIC**

**AERODYNAMIC**

REF. 9225

The protection against the wind is a fundamental part of your bike and PUIG knows how important it is to help achieve the best aerodynamic coefficient of our screens. For this reason we have developed these deflectors compatible with PUIG screens and OEM designed to fit perfectly with its design and assembly, without fitting problems or unwanted gaps.

AERODYNAMIC

REF. 21236W

REF. 21340F

Designed to offer better aerodynamic protection to Custom and Cruiser style motorcycles that have the original front fairing. With elegant and sober shapes, it adapts perfectly to the attractive aesthetics of this type of motorcycle.

Two versions are available, Sport and Touring, with 223 mm. and 323 mm. height respectively, so that each user can choose the one that best suits their riding needs.

Thanks to its design study developed with wind tunnel technology, the High-Road screens are more inclined to bring them closer to the driver, cleanly diverting the frontal air stream that would impact the rider directly, eliminating annoying turbulence and vibrations on the helmet. It will significantly increase riding comfort and reduce fatigue to enjoy longer rides.

**NOTE:** To replace or change the screws of the windscreen, **please check page 72.**

TÜV ABE 39524 TYP CV13 PMMA ACRYLIC ABS

4,5 mm.

**NEW!**

REF. 21581F

Made specifically for the Harley-Davidson Sportster S, its Batwing style design, inspired by the sharp snout of white sharks, sports a very marked horizontal line that highlights a practically flat upper area that integrates perfectly with the tank and the set of the motorcycle. Therefore, it is ideal for those riders who seek to combine aesthetics and functionality in equal parts.

With the installation of the Fury semi fairing, the amount of air that would impact the rider is reduced, diverting the air cleanly to the sides, avoiding annoying turbulence, which considerably increases riding comfort and reduces fatigue.

# BRAKE / CLUTCH LEVER PROTECTOR

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**LEVER PROTECTOR**

The brake lever protector arises from the need to avoid accidental contact with other riders, avoiding the activation of the brakes and the consequent fall. In the design, Puig has prioritized protection and the integration of the protector into the set. For this, a bidirectional adjustment system of the protector, longitudinal and perpendicular to the fist, has been made.

**HANDLEBAR DEFLECTORS**

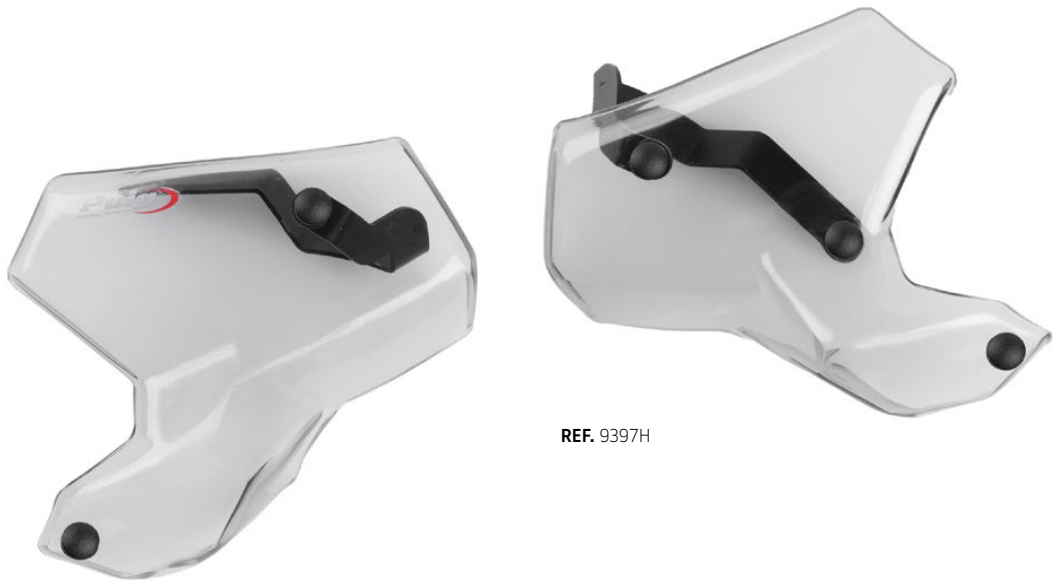

**F** Dark Smoke

**H** Smoke

**W** Clear

REF. 9397H

REF. 1319H

Exclusive product for BMW models that allow the direct impact of the air to be diverted on the rider's torso while riding, reducing fatigue and giving the motorcycle a new aerodynamic line. In addition, they protect sensitive parts of the motorcyclist such as the shoulders.

# MOBILE PHONE SUPPORT

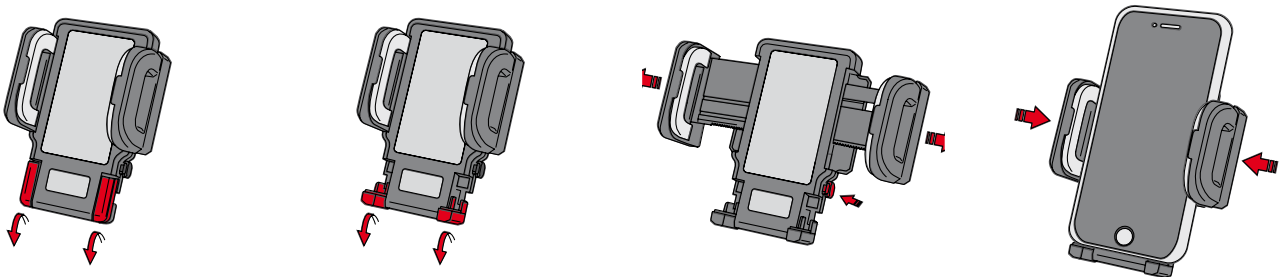

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**PHONE HOLDER**

REF. 3836N

## HORIZONTAL SMARTPHONE PHONE HOLDER

MODEL	DIMENSIONS (mm.)	REF.	N
UNIVERSAL			
MOBILE PHONE SUPPORT	500 x 500 -1150	3836N	(*)

(\*) Check price with your distributor.

Thanks to the Puig phone holder you can use your smartphone as a browser without suffering for its integrity and security. In addition, in our catalog you will find a line of accessories related to your mobile phone and its protection during journeys of all kinds and with different weather scenarios.

The support will allow you to integrate your phone comfortably and without affecting the final visibility of the road. The locking mechanism adapts to the inches of today's phones. The padded area on the sides and the back, where it rests, improves its grip, and prevents vibration that could affect its operating system.

You can mount the phone holder on the base of the mirror, the mirror rod, on the handlebar and on the seat post of the motorcycle where it will be more immobilized against possible impacts or potholes on the road.

## HANDLEBAR

MODEL	REF.	N
UNIVERSAL		
HANDLEBAR BRACKET	3534N	(*)

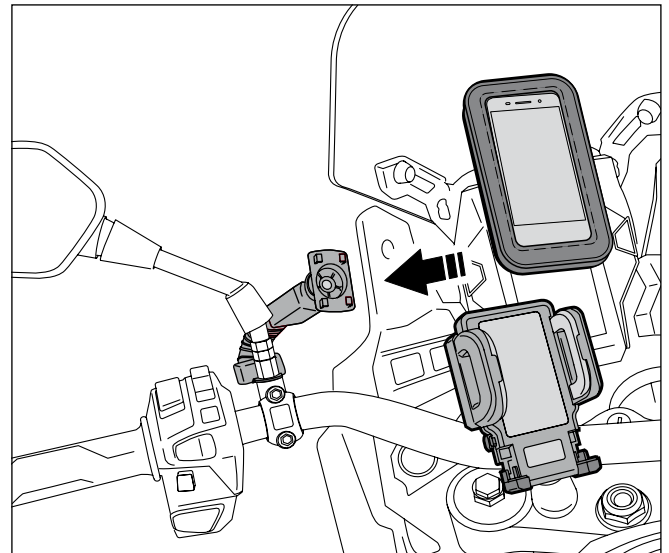

This element allows you to directly adjust the support for the Smartphone to the handlebar of the motorcycle. It is made out of two halves that adjust to each other with the handlebar in between, while they adjusted through a thumbscrew. We also offer different thickness rubber spacers, so that it ends up perfectly adjusted to the motorcycle.

**Compatible with the mobile phone holder Ref.3836N and the Puig Motoplástico quick-fix covers Ref.3530N and 3531N.**

This part is good for any handlebar that has a diameter of Ø20 until Ø25 mm. and just like any of our supports, it is compatible with our cel phone covers.

REF. 3532N

## REARVIEW MIRROR BASE

MODEL	REF.	N
UNIVERSAL		
REARVIEW BASE SUPPORT M8/M10	3532N	(*)

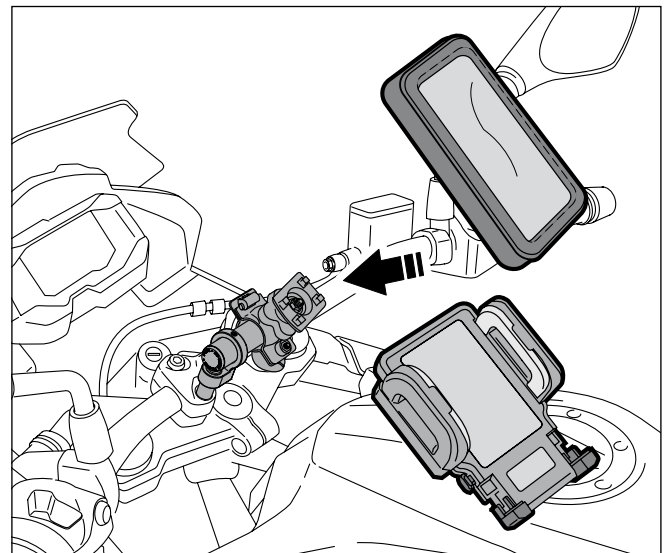

Support for the rearview mirror base, it is an universal support with complete mobility, 360° and also allows 100% adjustability to guarantee the best view during the ride, so the rider doesn't lose focus of the road.

**Compatible with the mobile phone holder Ref.3836N and the Puig Motoplastic quick-fix covers Ref.3530N and 3531N.**

The support is made of a metal base and a semi-rigid arm that guarantees a perfect attachment to the base of the rearview mirror. This support is good for all those motorcycle models that carry the rearview mirrors over the handlebars and are also compatible with Puig's covers.

REF. 3533N

## REARVIEW MIRROR ROD

MODEL	REF.	N
UNIVERSAL		
REAR VIEW MIRROR SUPPORT	3533N	(*)

A support of easy and quick application, where the plastic cover hugs the rearview mirror rod and it is attached by a thumbscrew. It is offered with different rubber spacers, of different thickness, to adapt it to the different motorcycles needs.

**Compatible with the mobile phone holder Ref.3836N and the Puig Motoplastic quick-fix covers Ref.3530N and 3531N.**

This support is good for mounting over any rearview mirror with a cylindrical rod of Ø9 until Ø25 and just like the last one it is compatible with our covers.

# BEAK EXTENDER

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**BEAK**

Thanks to its manufacture in ABS (matt black), a plastic material highly resistant to impacts, this beak extender will perfectly protect the front of the motorcycle.

It is a piece that is easy to assemble, since it does not require drilling holes in the front fender.

## ABS

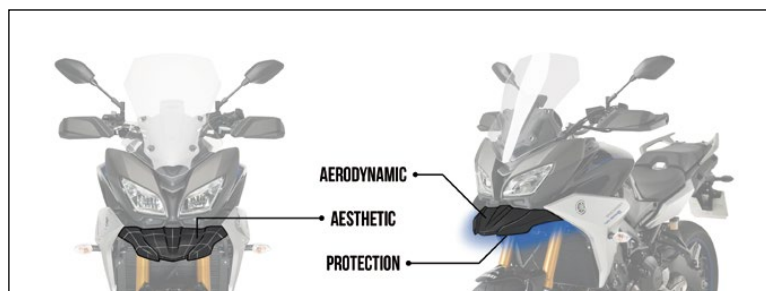

REF. 3483J

REF. 3837J

This beak-shaped extension protects against splashes and the impact of small objects, such as stones, insects... that we can find both on the road and on dirt roads, while providing an aerodynamic improvement, giving an extra load on the front axle providing better stability on fast roads. Therefore, it is ideal for trail motorcycles that can combine riding both on dirt and on asphalt.

# RADIATOR SIDE PANELS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window.

**RADIATOR COVER**

Give a sporty touch to your motorcycle and protect yourself from possible inclement weather with the Puig radiator covers. Made of ABS, a highly impact resistant material, it protects one of the most sensitive areas of your vehicle.

 **C** Carbon look

 **J** Matt black

ABS

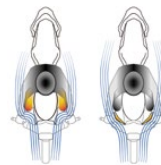

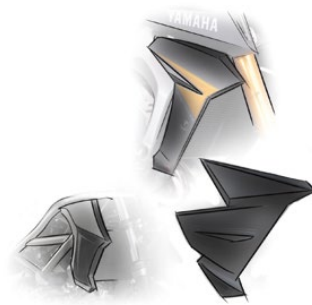

REF. 8564C

REF. 9371J

Radiator covers are available in matt black and carbon look to perfectly match the aesthetic lines of your bike.  
These are easy to assemble pieces that are accompanied by instructions, simple and visual, for proper placement.

They cover the radiator's side edges and provide a continuous air flow around the rider's legs.

**PROTECTION**

Protects the rider from inclement weather.

# LOWER DEFLECTORS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**LOWER DEFLECTOR**

PMMA  
ACRYLIC

C Carbon look  
 F Dark Smoke

H Smoke  
 W Clear

REF. 9848H

They adapt perfectly to the lines of the motorcycle thanks to their design and the quality of their finishes, allowing the airflow to be diverted away from the legs and improving riding comfort.

# HEADLIGHT PROTECTOR

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**HEADLIGHT PROTECTOR**

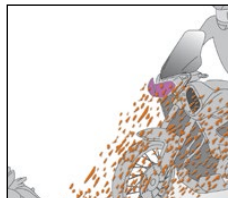

REF. 3733W

REF. 20413W

**PROTECTION**

Avoid impact of objects or insects on the headlight.

Protection made of polycarbonate that will perfectly protect our headlight. The steel supports are painted with EPOXY paint, in black, to preserve the original aesthetics of the motorcycle as much as possible.

Manufactured and designed in Barcelona with the highest technologies and materials for a high quality accessory that enhance the performance of your motorcycle and protects it from inclement weather and possible impacts that could scratch or break your front light.

# ADHERE HEADLIGHT PROTECTOR

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**ADHERE**

W Clear

**STEP 1**

Clean the headlight by splashing a little water and soaking it well.

**STEP 2**

Position the headlight protector and center it.

**STEP 3**

Press from the center to the sides.

Effective protection of the headlight against the impact of small objects, scratches, dirt, insects and premature wear due to exposure to UV rays. It is made of a high-end 200 micron thick, totally clear polyurethane sheet.

Therefore, it remains unnoticed when installed on the motorcycle without affecting the aesthetics and guaranteeing optimal lighting. It can be installed and uninstalled easily and quickly, without leaving any type of mark, it does not scratch or come off when washed or inclement weather.

Durable and waterproof self-adhesive vinyl

Adhesive

Easy to apply so there are no air bubbles

Easy to clean

Anti-scratch treatment

UV resistant

**Material:** clear adhesive PVC, shaped and designed specifically for each motorcycle model.

# HI-BEAM 3.0 AUXILIARY LIGHTS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**AUXILIARY LIGHTS**

## TECHNICAL CHARACTERISTICS:

**Low consumption:** 60w (30w per light)

**Voltage:** DC 12V

**Lumens:** 2200L M (1100L M/light)

**Material:** PC Lenses / Aluminum housing

■ N Black

**NEW!**

**HOMOLOGATED**

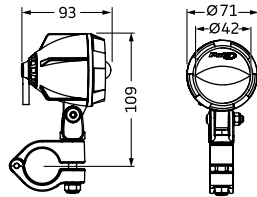

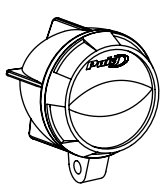

Intermediate in size and performance between the Hi-Beam and Hi-Beam 2.0 auxiliary lights, they have the same regulation as the Beam 2.0 model.

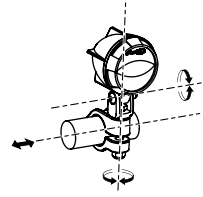

The 3.0 version continues to provide an extra lighting, since it improves our vision in different circumstances such as night riding, fog, rain, snow and twisty sections.

They incorporate LED technology to combine power and low consumption, they can be installed easily and safely on motorcycle fenders and are adaptable for 25 mm. diameter tubes.

Due to their size, they cannot be installed on Puig's R19 frame sliders.

**DIMENSIONS**

# HI-BEAM AUXILIARY LIGHTS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**AUXILIARY LIGHTS**

## TECHNICAL CHARACTERISTICS:

**Low consumption:** 40w (20w per light)

**Voltage:** DC 12-24v

**Lumens:** 4000L M (2000LM/light)

**Material:** PC Lenses / Aluminum housing

**N** Black

**HOMOLOGATED**

Universal fog lights and aluminium case painted black.

LED technology with low power consumption, avoiding putting the battery in danger due to excessive consumption.

Supplied with instructions on our engine guards. Fit engine guards between 23 and 25 mm. diameter.

Equipped with a fuse and cables to connect directly to your battery and with a water proof switch to be installed on your handlebars.

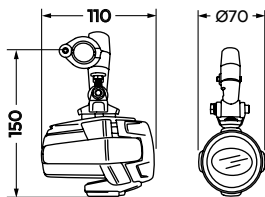

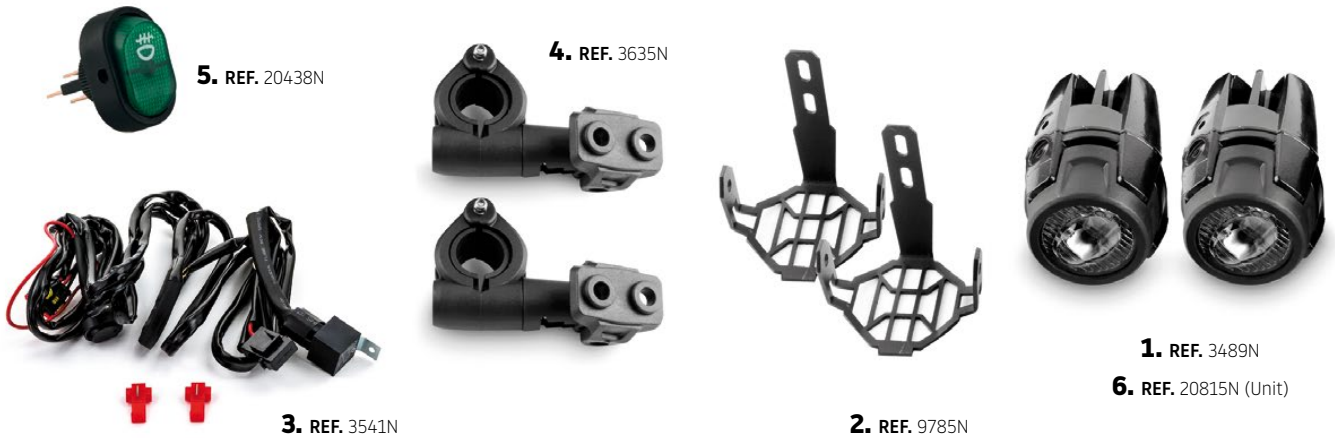

Aluminum housing designed to promote heat dissipation.

Optional metallic grill protections for offroad use.

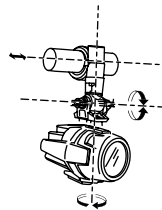

Sells separately (Ref. 9785N)

**MOUNTING:**

To mount the auxiliary lights on the Puig engine guards use only one of the two spacers that carries the support and the allen screw M6 x 50.

**DIMENSIONS**

**ADJUSTABLE**

**ADAPTABLE**

Adjustable to 25 mm. diameter tube.

# TURN SIGNAL COVERS

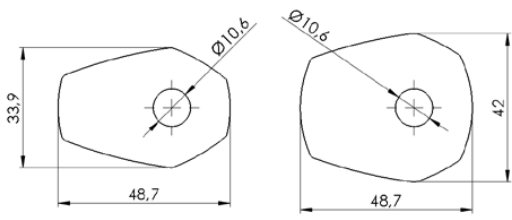

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**SUPPORT TURN LIGHT**

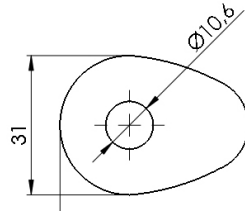

By replacing the standard turn signals with universal ones, on certain models there is a space left in the fairing that does not affect the functionality or the rigidity of the fixing but which, when stationary, can condition the aesthetic result of the motorcycle customization work. To resolve this, Puig offers a wide range of references for this cover.

# RESISTOR SET FOR LEDS TURN SIGNALS AND FLASHER RELAYS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**RESISTANCES**

## TECHNICAL INFO TURN SIGNALS CONNECTIONS:

Most of the bikes use bi-metallic relays. Its frequency (which is the one that sets the pace of the turn signals) depend on the amperage circulating through the circuit. When replacing the turn signals from OEM to aftermarket ones which carry a difference power, consequently they vary the amperage circulation through the circuit that causes a change on the frequency of the turn signals rhythm. If otherwise, the motorcycle uses electronic relay (which frequency works independently from the amperage circulating through the circuit) the change of turn signals from OEM to aftermarket, should not affect the frequency of the turn signals rhythm.

• **Note:** In case of doubt of what type of relay the motorcycle uses, we recommend to check the turn signal rhythm after switching from OEM to aftermarket.

If the OEM turn signals are replaced by aftermarket ones that use incandescent bulbs, we need to check they use the same power. In case it is different, we need to replace the turn signals bulbs for others that use the same power as OEM ones. On our catalog, we have available bulbs of different power.

If the OEM turn signals are replaced by LED ones (of much less power than incandescent bulbs), we have two options to balance the frequency of rhythm:

**1.** Incorporate a parallel relay in the right circuit and the other on the left circuit. If we replace four turn signals, we need to use a resistance **Part# 42980**.

If otherwise, only two turn signals are replaced (one on each side), we need to use a resistance **Part# 58730**.

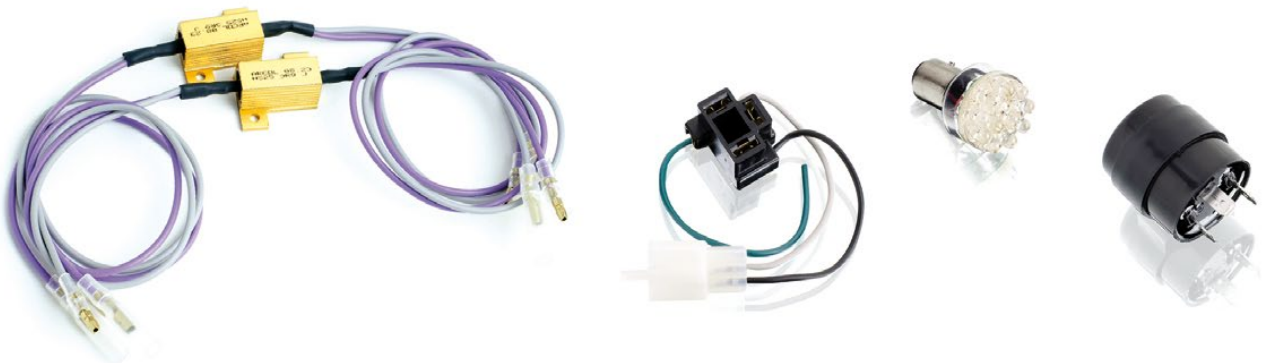

The resistances are supplied with a scheme for a parallel connection.

• **Note:** On most of the bikes, the warning function of the bike is disabled if the resistance is used.

**2.** Identify the intermittent relay of the motorcycle (location and number of pins) and replace it for its corresponding from the list supplied on most of the bikes, the warning functions work correctly when the relay is replaced.

• **Note:** we can find some motorcycles in the market that do not have an intermittent relay, obviously in this case it cannot be replaced. Moreover, if on the blinking function intervenes more than one relay, it is possible that replacing only one relay does not solve the problem.

• **Note:** some LED turn signals flash faster than normal when connected to power (it is normal to check the polarity of the cables with the flashing function activated). To verify the actual flashing frequency, remove all power by turning the key to the "off" position and then move to the "on" position to activate the flashing function.

AERODYNAMIC

 C Carbon look

 J Matt black

REF. 20705C

REF. 20704J

Made to convert the motorcycle into a single-seater while providing a personalized and sport look similar to competition motorcycles.

Its studied design includes internal channels that, in addition to lightening the assembly, help to reduce the turbulence generated by the air, improving the stability of the motorcycle, especially at high speeds.

The front part of the tail incorporates a black foam for better rider comfort when sheltering at high speeds. This piece is made of matte black ABS plastic or 4 mm. thick resistant and light carbon simile. Its assembly is very simple since the Puig tail cover uses the same anchoring system as the passenger seat it replaces. All you have to do is remove the passenger seat and put the Puig rear seat cowls.

# LICENSE SUPPORTS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**LICENSE SUPPORTS**

Replace the original license plate holder of your motorcycle with the Puig license plate holder. Its elevated location gives a Racing character to your motorcycle. The set combines steel parts finished in epoxy paint with parts in Polyamide, achieving a significant reduction in weight compared to the original support.

# SUPPORT FOR ORIGINAL TURN SIGNAL

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window.

**SUPPORT TURN LIGHT**

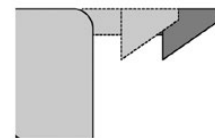

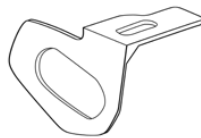

With this support, you will be able to improve the image of your motorcycle and mount the Puig license plate holders without having to modify the original turn signal of the bike.

The piece is made of steel and finished in black EPOXY paint.

REF. 9320N

#### FUNCTION

They allow the assembly of the original turn signals in the PUIG license plate holders.

#### MATERIAL

Made of steel.  
Finished with epoxy black paint.

#### OPTIC

Hides the empty section left by the original turn signal once replaced.

ADJUSTABLE

CNC MACHINED

Machined from billet aluminium and anodized in different colors.

Machined from an aluminum block, they are light as well as resistant, they have a black anodized finish to give them a perfect finish and easy to combine with most motorcycles on the market.

They also have an adjustable lever, which allows it to be quickly and easily adjusted to the position preferred by each rider according to their needs and riding style. Both the base of the clutch lever and the brake lever incorporate a rubber coating with non-slip grooves to improve grip and feel when using them.

# KICKSTAND EXTENSION

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**KICKSTAND**

Provide your motorcycle with greater stability and support surface while it is parked with the new kickstand extension from Puig.

Designed to prevent possible falls of the motorcycle while it is parked. This piece, with a 100% wider base than the original, allows parking on soft or uneven surfaces with greater safety. It is a mixed piece, with a part in stainless steel and the other machined from an aluminum block with rear anodizing.

These materials provide great resistance while maintaining a low weight (110-160g depending on the model). This product will prevent the motorcycle from suffering any setback when not in use.

# OIL-CARTER GUARD

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

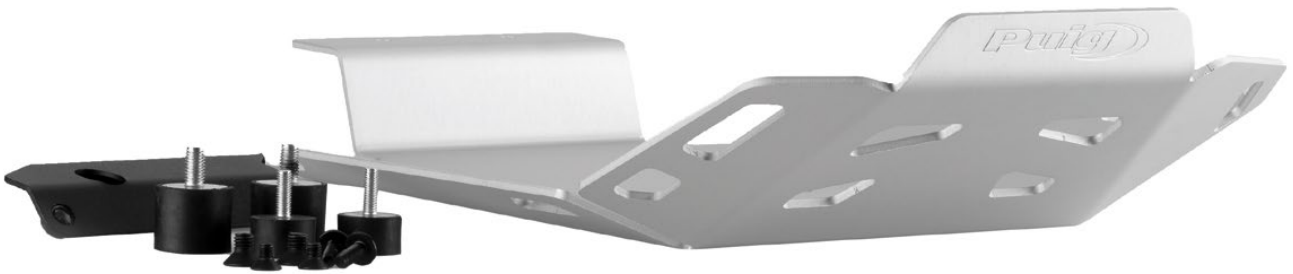

**CARTER GUARD**

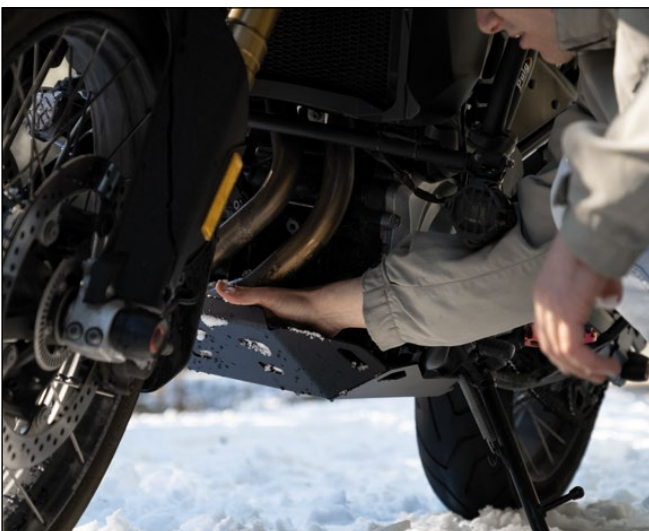

The lower part of the protector is completely flat, which makes it easier to lift the motorcycle from the lower part in the mechanical workshop if necessary, and it has holes to guarantee good cooling and to evacuate water, mud, or small accumulated stones. In addition to facilitating the oil change operation avoiding removing the protector.

The protector is fixed to the lower part of the motorcycle with anti-vibration rubber supports that absorb any possible blows that the protector may receive, distributing the impact force through the different fixing points and, in turn, eliminating possible annoying noises that exist when these rubbers are not being used.

P Silver

**NEW!**

REF. 21464P

With its installation, valuable and sensitive areas are protected from receiving damage and impacts from stones and mud, such as the crankcase and the union of the headers, even more important if we take into account the Offroad possibilities offered by both models.

Manufactured in Barcelona, it is made of high-end 4 mm.-thick aluminum, resulting in a very resistant piece as well as light, and has a matt silver anodized finish.

It includes specific metal supports with anti-corrosion treatment painted in textured black for a discreet and elegant finish.

 N Gloss Black

REF. 20428J

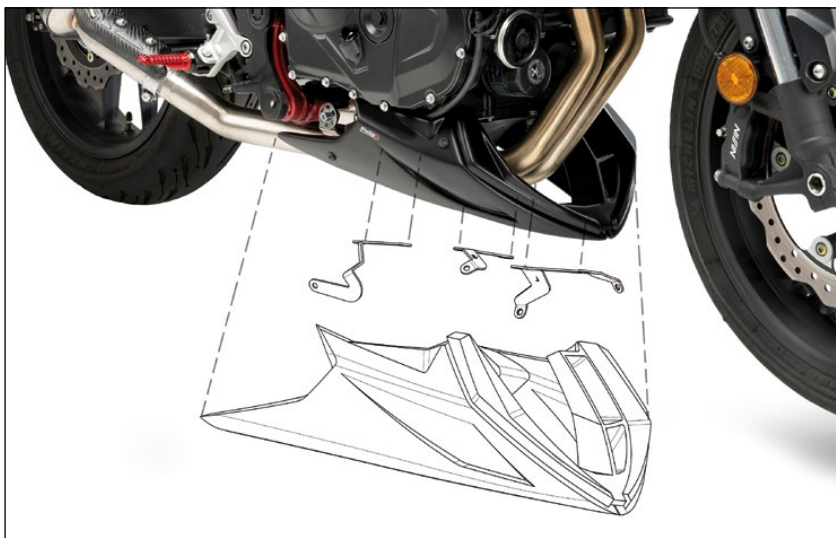

REF. 21327J

Protect one of the most sensitive parts of your bike with Puig engine spoilers.

Tested in the virtual wind tunnel to achieve a more aerodynamic volume and improvement in stability while riding, they protect the lower area of your bike from possible impacts, dirt, etc.

Manufactured with the highest technologies, its components are made of aluminum and/or ABS materials that are highly resistant to impacts and UV rays, in turn they are light and durable. The plastic parts have a built-in surface treatment that improves the behavior against chemical agents and in turn also offers total protection against UV rays.

This layer avoids the need to have to paint the engine spoiler. The metal supports are made of 2 mm. metal, with anti-corrosion treatment, resistant and easy to install. In addition to protecting the motorcycle, Puig engine spoilers are designed to give your bike a more sporty character, so most models come with a sticker kit to customize them. You can find these engine spoilers in two finishes: black or carbon-like.

Easy assembly - 15 minutes.

No modifications required.

Check compatibility with other exhaust pipes.

Its double section and central grooves give it a slimmer appearance without losing muscle. The optional incorporation of rubber rings has a double function: they protect the rider from possible impacts and allow the protector to be personalized with its range of colors.

# ENGINE GUARDS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**ENGINE GUARD**

-  N Black
-  U Grey

REF. 21192

Made of steel using high quality machining and precision welds for a perfect fit.

Perfect complement for Trail or Naked type motorcycles, in which the absence of a fairing makes them especially vulnerable to blows in the event of a fall. Improvement in safety and rigidity, in addition to receiving an aesthetic complement that reinforces its image and gives a greater sensation of robustness.

Our Beam, Beam 2.0 and Beam 3.0 auxiliary headlights can be mounted on our engine guards.

# ENGINE PROTECTIVE COVERS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**ENGINE COVER**

Manufactured in 4 mm. thick polypropylene for strength, durability and good appearance. The covers are simply bolt-on on the oem engine case.

Compact for a maximum distance to the ground, matt finished, and protecting one of the most vulnerable areas of the machine.

REF. 20221N

REF. 20289N

# APPROVED ENGINE COVER PROTECTOR KIT

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**ENGINE COVER**

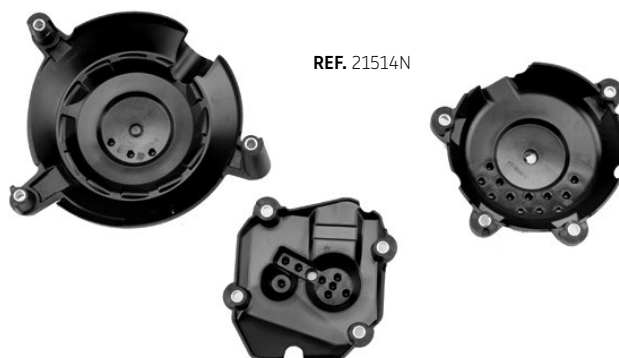

## NEW!

Made of 4 mm. polypropylene that provide great resistance to impacts and abrasion, as well as offering the maximum possible lightness.

With its installation, the most exposed parts of the engine are protected in case of falls and dragging.

**Caps with wear warning approved by the International Motorcycle Federation (FIM). Suitable for professional riding.**

 Covers empty areas of the motorcycles.

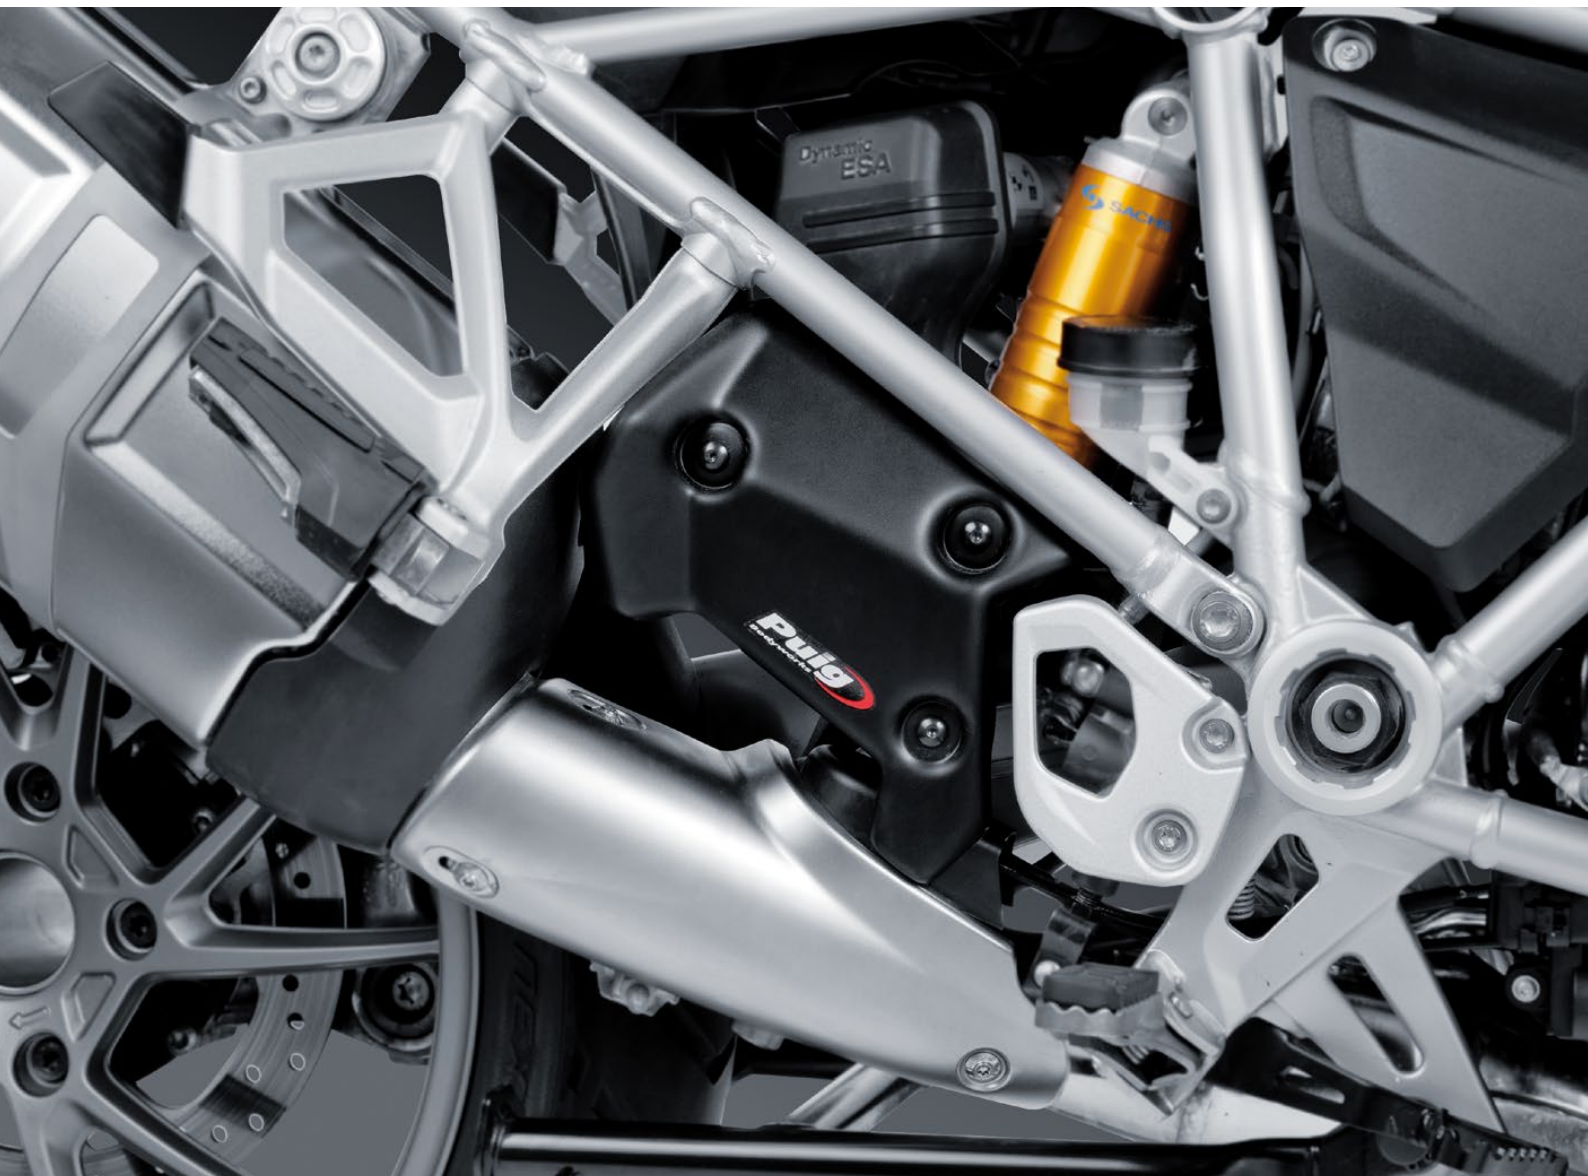

# REAR DEFLECTORS

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**DEFLECTORS**

## ABS

Manufactured in ABS material, highly resistant to impacts and with great aerodynamic capacity, it will allow you to improve the condition of your bike during the ride before the wind, as well as enhancing the aesthetic image while you cover hollow areas of the motorcycle. Designed exclusively for BMW specific models.

The piece is available in different colors depending on the BMW model that you have and installation will not be a problem since it comes with Puig's classic visual instructions.

# EXHAUST PROTECTOR - DEFLECTOR

\* Check availability for motorcycle models at [www.puig.tv](http://www.puig.tv) typing in the searching window:

**DEFLECTORS**

**ALU**

The exhaust manifolds of the BMW R 1200 RT are safe with the deflector-protector of escape from Puig.

This piece of the Hi-Tech Parts catalog fulfills a visible decorative and personalization function for the German tourer, but above all it is an element with an important functional mission, since it protects the exhaust of possible blows that may deteriorate it and affect the performance of the motorcycle.

Made of aluminum, its precise design allows it to adapt perfectly to the lower part of this BMW, the area most exposed to gravel impacts or other objects on the road.

**BRAKE COOLER**

**ABS**

**METALIC  
MADE**

**AERODYNAMIC**

**N Black**

The brake cooler has been designed taking into account the high performance offered by sports riding, in which its effective set of brakes is pushed to the limit, with strong and continuous braking like those on the circuit, and even more so in the hot months.

This can cause overheating that reduces performance and braking sensations. It is made up of two high-end ABS plastic covers, one for each disc and caliper assembly, creating a channel that captures the air and compacts and accelerates it to direct it directly on the pads and the brake disc, managing to lower the temperature of the brakes by ten degrees on average as has been verified in race track tests, which allows them not to overheat and work optimally.

Its studied design, in addition to providing a more sporty and personalized aesthetic, eliminates turbulence at the front wheel by creating a partial lenticular cover that favors the motorcycle's aerodynamics, especially at high speeds. Includes sturdy, lightweight aluminum brackets finished in discreet textured black.

Our brake cooler offers greater air channeling by having a larger intake mouth than the competition. Totally different aesthetic. At the same time, it improves aerodynamics by converting part of the front wheel into a lenticular one. Contrasted effectiveness.

**Motoplastic-Puig** has a blowing division specialized in the manufacture of special trunks for the delivery sector and supports for the best-selling scooters. Presented in different formats and sizes to meet all transportation needs. They are made of polypropylene with high resistance to impact and with a certificate of suitability for contact with food. Its manufacturing system guarantees an excellent ratio between the weight of the trunk, its load capacity and shock absorption. They come in three colors and with a locking system that allows its use with or without a key. As they are references of considerable volume and as they are shipped directly from the manufacturing plant, the shipping costs will be billed separately, even if the amount paid is reached for orders over € 1.000 gross.

#### **SALES CONDITIONS**

- 1% extra discount sending the order through our extranet on **www.puig.tv**

#### **RETURN PROCEDURES**

- No return will be accepted after 3 months from shipping note.
- The return must be accepted from Motoplastic S.A., after verification of the material by an agent in the area or, otherwise, through an email sent to **devoluciones@puig.tv** requesting the return along with detailed images.
- If the return is not Motoplastic's fault, 20% devaluation will be applied and material will need to be sent paid for.
- If the return is because of the transport, the customer will need to send us the transporter's shipping note where should be noted, at the time of the reception of the cartons, the disagreement of the condition of the material. Additionally, images of the cartons in bad condition will need to be sent to us.

#### **BRAND AND IMAGES**

PUIG® is a registered brand.

The images from this catalog and site **www.puig.tv** are property of Motoplastic, S.A. and need authorization from Motoplastic, S.A. for its use.

Motoplastic, S.A. does not have any link with brands HONDA, YAMAHA, SUZUKI, KAWASAKI, APRILIA, BMW, BUELL, CAGIVA, DERBI, DUCATI, HYOSUNG, KTM, MV AGUSTA, PEUGEOT, TRIUMPH and others mentioned. All products registered brand, model or initials, are named with only purpose to cross reference with accessories of our own production.
